ADVANCED CARDIAC IMAGING (CT, MRI, PET)

WITH HANDS ON TRAINING (SIEMENS, PHILIPS, GE) AND
ADVANCED PULMONARY IMAGING SYMPOSIUM.

The Non invasive Cardiovascular Diagnostics, including in particular US, CT, MRI and PET diagnostics play an increasingly prominent role in modern day patient care. Technological advancements in these fields require continuous learning and development. In order to be able to maintain high standards while performing our work, we must learn the specialties of Cardiological diagnostics. The Central European Conference on Noninvasive Cardiovascular Imaging (medium and advanced level of cardiac imaging) provides us with an excellent opportunity for developing our knowledge. We have invited the world's most noted lecturers in this field, thereby guaranteeing a very high

professional standard to the conference, providing an opportunity for radiologists to participate in a world-class training event at acceptable cost.
